

(A) Everyone look through all the code

(B) Number of bugs found (offline) - 0

(C) Number of bugs found (during review) - 3

1. `should` be used `@link` instead of `@import` because `import` prevent parallel downloads
2. `outline` shouldn't be used in `body`, `.login-form input`, `.login-name input`, `.rem`, `.form button` because it is not good for accessing an item
3. `padding` should be rewritten to `padding-left`, `padding-right` etc.

(D) Number of false bugs (offline) - 0

(E) Number of false bugs (during review) - 0
